

SIMS Parent Lite app

We are in the process of rolling out our SIMS Parent App to our Stanborough community. Some parents of Y9 students may already have this from completing the Options process last year, and we are now extending this opportunity to all our parents.

What can I see or do on the SIMS Parent app?

SIMS Parent App enables you to access information about your child and provides the opportunity to update the school with key information.

Using SIMS Parent App

As the system is rolled out, you will receive an invitation code to join SIMS Parent app. The invitation will have been received from noreply@sims and will be valid for 14 days.

A guide on how to setup the Parent App is attached.

Usernames and passwords are not issued directly by the school as parents can use their existing Facebook, Twitter, Google or Microsoft Account credentials.

If you do not have any of the above then please find below links to create a free Google or Microsoft Account

Support & Registering for SIMS Parent App

If you have any issues with signing in to the SIMS Parent App, contact ITSupport@stanborough.herts.sch.uk.

App Version

Available on Apple & Android devices please click below to download the appropriate app.

Apple iOS

Android Store

Web Version

There is also an online web-based version which can be found at www.sims-parent.co.uk.
