## Louis Vuitton and Yayoi Kusama Collaboration

Louis Vuitton presented its second collaboration with Yayoi Kusama on Thursday at a pop-up store in New York's meatpacking District, just across the street from the Whitney Museum. Inside, uniformed men held silver platters of champagne amidst a sea of black dots covering yellow walls, mirrors and reflective spheres. A giant, standing LV sign, encrusted with more chromatic spheres, stood glinting and flashing. The simple forms speak to Kusama's body of work. The mirrors are a nod to her viral "Infinity Rooms" the first of which was debuted in 1965.

## 'A Little History of Art' by Charlotte Mullins

Charlotte Mullins brings art to life through the stories of those who created it and, importantly, reframes who is included in the narratives to create a more diverse and exciting landscape of art. She shows how art can help us see the world differently and understand our place in it.

## Dozens of Exhibitions Worldwide marking the 50<sup>th</sup> Anniversary of Picasso's Death

Picasso is one of the most influential artists in the 20<sup>th</sup> century. The many sides of Pablo Picasso's life and work will come under the spotlight this year as institutions in Europe and the US mark the 50th anniversary of the Spanish artist's death. Picasso's fame and extraordinary output means that although there is always a Picasso show on somewhere in the world (not to mention at the several museums dedicated to the artist), 2023 will see a veritable bonanza of them. Museums have organised several exhibitions pairing Picasso with other artists, whether it be with those who influenced him, like El Greco, Nicolas Poussin, or contemporaries like Joan Miro and Max Beckmann.
