

Stanborough

Mathematics & Computing Academy

Headteacher: Mrs M John

2nd December 2025

Dear Parents/Carers,

Year 7 Maths Update

Following the recent Key Assessment, and teacher feedback from lessons, we have made the decision to review the setting of our Year 7 cohorts and have made the necessary adjustments which will come into effect on Monday 8th December 2025.

Please check your child's Arbor for the week commencing the 8th December, to identify which class they will be in from this point.

Please be reassured that any changes made are designed to support your child's progress in mathematics; by ensuring they are in a class which is appropriate for their current working level. By setting our classes in maths, we can provide targeted teaching and learning, offer additional support for pupils who need further consolidation, and further challenge, ensuring all pupils are given the opportunity to find success at this stage of their mathematical journey.

The setting of pupils is constantly monitored and reviewed throughout the year, and teacher feedback is a major part of this. On Thursday 4th December, you will meet with your child's **current** math teacher and if there is a set change affecting your child, they will be able to provide you with further feedback regarding this.

Please be assured that these adjustments are part of our ongoing commitment to helping every pupil achieve their full potential.

If you have any further questions, concerns or queries, please do reach out to your child's math teacher in the first instance.

Thank you for your continued support.

Kind regards,

Miss Masterson
